*Dare to be excellent.*

**St Helena Secondary College seeks parent and community support in contributing to the improvement of buildings and grounds, student related services and the purchase of additional library and research equipment for student use.**

## **The St Helena Building Fund**

**(Tax Deductible Gift Recipient Status)**

In 2008 a major project commenced to redevelop the College's S M Dyet Theatre, which was built when the College was established in 1984. The new facility will include renovated theatre seats, air conditioning, drama/dance space and music tutorial rooms.

We invite our College Community to donate to this exciting initiative by making a donation to the St Helena Secondary College Building Fund.

This is a tax deductible contribution and a receipt will be issued for all donations to enable you to claim on your income tax return.

### **Why Give?**

St Helena believes that our students' environment should not be limited by inadequate facilities, traditional learning spaces or inaccessibility. The financial support of families and friends of St Helena is sought to supplement Government funding and bridge the gap now and in the future.

**Chaplaincy within our College is invaluable in catering for individual wellbeing. St Helena is extremely fortunate to have a College Chaplain and his work will be complemented by an Associate Chaplain in 2009.**

Even with continual, enthusiastic fundraising by the Chaplaincy Fundraising Committee, the College needs your financial support to continue this valuable service.

## **Greener St Helena Project**

Our award winning, landscaped grounds are a feature of the College and provide a pleasant environment for our community.

However, drought conditions over the past decade have severely hampered our ability to maintain recreation areas including the Agora and playing fields and many varieties of plants in our garden beds.

We are replanting to provide a weed safe and sustainable environment which considers the conservation of water through rain water tanks and mulching, a natural "bog" and drought resistant plants.

You can help to "green" our College surroundings by donating to our eco-friendly environment.

## **Library and Research Resources**

St Helena prides itself on offering the latest in innovative learning. We are constantly refining our curricula to ensure that our students are offered up-to-date information and communication technologies to equip them with necessary tools needed to meet an ever-changing world.

Their successes in many fields extending from the sciences (nanotechnology) and information technology to the arts and humanities, bear witness to the relevance of our programs.

However, we cannot be complacent. This year we have introduced new technologies, Click View and Moodle to enhance learning outcomes, but must continue to acquire new aids and material for our library and audio visual department to assist our students in their learning.

Your contributions will help us to achieve these goals.
